

New Jerseys No Call List is not strict enough. Callers still are able to get through and call at all hours. Its bad enough when your at home and need to answer unwanted calls, but at work is even worse. Some of us have businesses that require us to be doing physical work, not always near the phone. A telemarketer calls, you have to stop working, and sometimes stop others from working, just to answer an annoying call. Thats harrassment!
